

Put your business online today with special AREIP member pricing

AREIP and OrangeCat.net have put together some special packages for AREIP members that can get your business online with no installation or configuration on your part – pre-installed Open-Realty or WordPress web hosting.

Put your real estate listings on your own domain using Open-Realty, build your own mailing list, use WordPress to build your search engine ranking and buy or sell more houses!

Open-Realty is an Open Source (free to use) real estate listing application that allows you to build an entire real estate website. It is easy to use and easy to update – you don't need to know any code. There are dozens of templates to customize the "look-and-feel" of your website and add-ons to make it even more powerful. And you don't even have to worry about installation and configuration. OrangeCat.net will take care of all of that for you. You can learn more about OrangeCat.net Open-Realty pre-installed web hosting right here, but don't forget to come back and get your special AREIP member pricing here.

If you already have access to a listing application or already have your own website, you know that you need to build traffic to your site and listings. WordPress software can help. The search engines love blogs and WordPress can get you started blogging in minutes. And OrangeCat.net will get you set up, install and configure WordPress, install and activate plugins to make your website even more attractive to Search Engines. You can learn more about OrangeCat.net WordPress pre-installed web hosting right here, but don't forget to come back and get your special AREIP member pricing here.

Remember that you can order either Open-Realty or WordPress as the primary (root) application on your server, and the other as secondary. We'll install and configure both at no extra charge.
